

Introduction to HTML

Doyle & Quiambao | Lecture 1

*lecture adapted from John Driscoll

What is HTML?

HTML: Hypertext Markup Language

Formatting your web document

Other web languages: CSS and Javascript

Naming Files

File name of first page of website: index.html

Do not use numbers or spaces

Use from 8-10 characters maximum

HTML Tags and Elements

HTML tags are also called elements

Structural tags verses phrasing tags

Examples:

Structural

<head>
<title>
<body>
<h1>
<p>

Phrasing

<a href>

HTML Tag Guidelines

HTML tags need to be in lowercase

They should have a starting and ending tag

`<body>`

Starting Tag

`</body>`

Closing Tag

HTML Tag Guidelines

Structural tags contain phrasing tags

`<h1>` `` `` `</h1>`

Structural Tag

Phrasing Tag
